new Army Bill only became law on the 1st of this month. Three days later Marshal Niel berings. ordered the census to be taken of those youths. er than who had been exempted from military service in 1864, 5, 6, but who will now be called upon to ne great in 1864, 5, 6, but who will like Mobile. Four days mail is enter the National Guard Mobile. Four days later again the Bill fixing the contingent for ters. ten 1868 at 100,000 conscripts was taid before the Legislative body. We can hardly attempt to describe the sen-ation created in France by these hasty measures. There has been no lack and chil- of popular demonstrations to convince the Goand, now vernment that the new law will roin the couninaman, try. The year of the Great Exhibition was in English many respects one of unprecedented prosperity recourse for France. The Second Empire has been an converse era of comparative peace, and there is no countime so try in which the effects of prelonged tranand Hotel at least of material advancement; but no real, top fre- solid well being is compatible with an armed epresent. peace. There is this drawback to all the ont in his apparent blessings of France—that agriculture byterians, does not keep piece with the general progress of vaces. old trade and industry. Nothing is more distressing entleman to Prench economists than the rapid depopulain the tion of rural districts. Every contrivance of lid, hard- modern civilization, the rapidity and cheapness of communication, the spread of knowledge, the remained tise of new wants and luxuries, contribute to namen promote no less than to facilitate a general what," he augration townwards; but the chief attraction ng his lips lies, of course, in the high wages offered by the ytea-trays | contractors of public works in the cities. Baron blime reli- (Haussmann has been capidly melting down the Chicaman manhood no less than the wealth of France in l-st once his Parisian improvements. Nor is a agriculture rejudiced, alone that suffers. The drain is equally fell in all, He is all other branches of industry. The unusual nation; be concentration of all the active forces of the you. Why nation on works of mere embellishment, the you are condensation of enormous consumption within very Land: a small compass, the creation of figlitious prices musement, of labour, waithe corresponding rise in all the nablime re- nucessaries of life must have a tendency to disto be at all turb all the laws, of economy, and to threaten tent Egypthe very foundations of public prosperity.
